PUMA Management Software is the most complete file management system available for storage, retrieval and management of digital voice recordings and photos for law enforcement.

Key to the success of PUMA is its ability to provide officers an easy platform to download their digital voice recordings, add file information such as case number or incident number if needed and store the audio recording securely. With various search options, a recording can be easily retrieved for playback or copied to a CD.

PUMA Management Software is the right solution for Law Enforcement agencies that want to securely and efficiently manage their audio recordings.

### Features:

- Copy audio files to CD/DVD for distribution
- Simplified interface for ease-of-use
- Custom demographics for department's unique needs
- Multiple search options to access data
- Internal messaging system
- Flexible security levels and access rights
- Detailed audit trail and 256-bit AES encryption
- Password Protected
- Built-in transcription support
